Professional Summary

Full Stack Developer and MERN Stack Developer with a **9.0 SGPA** in Computer Science Engineering. Proficient in **React.js, Node.js, Express.js, MongoDB, JavaScript (ES6+)**, and **Java**. Built an AI-powered financial reconciliation system with **JWT authentication**, RBAC, and fuzzy matching algorithms. Skilled in **REST APIs** and **Data Structures & Algorithms**. Open to Full-Time Software Engineer and Full Stack Developer roles.

Technical Skills

Programming Languages: Java, JavaScript (ES6+), SQL
Frontend: React.js, HTML5, CSS3, Tailwind CSS, Responsive Design
Backend: Node.js, Express.js, RESTful APIs, JWT Authentication, Role-Based Access Control (RBAC)
Database: MongoDB, MySQL, Database Design, Query Optimization
Developer Tools: Git, GitHub, Postman, Netlify, Vercel, Render, VS Code
Core Concepts: Data Structures & Algorithms, OOP, DBMS, Operating Systems, Computer Networks

Professional Experience

SaiKet Systems

Feb 2026 — Mar 2026

Web Development Intern

Remote

- Built **8+ reusable UI components** using **HTML5, CSS3**, and **JavaScript**, reducing frontend development time by **30%** and achieving consistent rendering across mobile, tablet, and desktop.
- Debugged and resolved **15+ frontend issues** through systematic testing and managed deployment workflows using **Git**, improving usability and version control practices.

Projects

AI-Based Financial Reconciliation System | *MongoDB, Express.js, React.js, Node.js* | [GitHub](#) Jan 2025 – Mar 2025

- Built a **full-stack MERN application** automating financial transaction matching using **3 fuzzy algorithms**: Levenshtein Distance, Jaro-Winkler, and N-Gram Similarity.
- Engineered a **fraud detection module** identifying duplicate transactions and suspicious patterns, secured with **JWT authentication** and **Role-Based Access Control (RBAC)**.
- Automated **PDF and Excel report generation**, reducing manual reporting effort by **5 hours** per reconciliation cycle.

Expense Scanner App | *React.js, Node.js, Express.js, MongoDB, Docker* | [GitHub](#)

June 2026 – July 2026

- Built a full-stack expense tracking app with **OCR receipt scanning**, **AI-powered duplicate detection** using **Node.js, Express.js, MongoDB**, and **Cloudinary** for image storage.
- Developed a responsive **React.js + Vite** dashboard with expense analytics and reporting using **Tailwind CSS**, **JWT authentication**, and **RESTful API** architecture.
- Deployed full stack via **Docker Compose** with backend, frontend, and **nginx** reverse proxy, including **email notifications** and automated data backups.

GitHub Profile Detective | *React.js, GitHub REST API* | [Live Demo](#)

Feb 2026 – Mar 2026

- Integrated GitHub REST API retrieving real-time data for **10+ profile metrics** including repositories, followers, and analytics in under **500ms**.
- Optimized **state management** in **React.js** to minimize re-renders and implemented **async API calls** for smooth UX during rapid consecutive searches.

Education

Dr. D Y Patil Technical Campus, Varale-Talegaon

2024 – 2027

Bachelor of Engineering (B.E.) in Computer Science Engineering

Pune, India

- **SGPA:** 9.00 / 10.0

K V N Naik Institute of Engineering Education & Research

2022 – 2024

Diploma in Computer Engineering

Nashik, India

- **Percentage:** 80.57%

Certifications & Awards

Alpha – Data Structures & Algorithms with Java – Practised problem-solving, time complexity analysis, and implementation of core data structures using **Java**.

Delta – Full Stack Web Development – Built responsive web applications using the **MERN Stack** (MongoDB, Express.js, React.js, Node.js).
